PROFESSIONAL SUMMARY

Detail-oriented and analytical Final Year Computer Engineering student with practical experience gained during a 6-month Data Analyst internship. Skilled in transforming raw data into meaningful insights using SQL, Python, Excel, Power BI, and Tableau. Experienced in data preprocessing, visualization, reporting, and business intelligence. Strong problem-solving mindset with a passion for leveraging data to support strategic decision-making. Seeking a Data Analyst position where I can apply my technical and analytical expertise while continuing to grow professionally.

WORK EXPERIENCE

Data Analyst Internship | Sagveek Technologies Pvt. Ltd., Pune 2026 – Present

- Analyzed datasets of 50K–200K+ rows using Python, SQL, and Power BI to generate weekly/monthly BI reports for leadership and cross-functional teams.
- Designed and maintained 6+ interactive Power BI dashboards with DAX measures, calculated columns, and dynamic slicers for real-time KPI monitoring.
- Automated 5+ recurring Excel and Power BI reports, reducing manual reporting time by ~40% and accelerating decision cycles.
- Developed complex SQL queries (multi-table joins, CTEs, window functions) for data extraction and analysis across large relational databases.
- Performed end-to-end data cleaning and transformation using Pandas and Power Query, improving report accuracy by ~30% by resolving data inconsistencies.
- Collaborated with Operations, Sales, and Finance teams to translate business requirements into data models and dashboards aligned with organizational KPIs.

AWS Cloud Internship | ProAzure Pvt. Ltd., Pune January 2026

- Gained hands-on exposure to core AWS services including EC2, S3, IAM, Lambda, and RDS, building a strong foundation in cloud infrastructure and deployment.
- Assisted in configuring and managing cloud storage solutions and virtual servers, ensuring secure access control and cost-efficient resource utilization.
- Supported the deployment of small-scale applications and data pipelines on AWS, integrating cloud storage with data analysis workflows.
- Collaborated with the mentoring team to monitor system performance, troubleshoot configuration issues, and document cloud architecture best practices.
- Strengthened understanding of cloud computing fundamentals, laying the groundwork for integrating cloud-based solutions into data analytics projects.

PROJECTS

Bank Data Analysis | Python, NumPy, Pandas, Matplotlib, Seaborn, Jupyter Notebook

- Performed end-to-end analysis of a bank customer dataset in Jupyter Notebook using Python, covering data cleaning, transformation, and exploratory data analysis.
- Used Pandas and NumPy to handle missing values, detect outliers, and engineer features such as customer tenure and balance segments.
- Applied statistical analysis and visualization (Matplotlib, Seaborn) to uncover patterns in customer churn, loan defaults, and account activity.
- Summarized key findings and actionable insights in a well-documented notebook, presenting trends to support data-driven banking decisions.
- Highlighted high-risk customer segments and recommended targeted retention strategies based on the analysis.

Retail Sales Analysis – Walmart | Python, Numpy, Pandas, Matplotlib, Seaborn, Jupyter Notebook

- Analyzed Walmart retail sales data to identify seasonal trends, top-performing stores, and product category performance.

- Cleaned and preprocessed raw sales data in Excel and Python before conducting exploratory analysis.
- Built visualizations to compare weekly sales against holidays, promotions, and regional factors.
- Delivered insights to support inventory planning and sales forecasting decisions.

Bank Performance Dashboard | *Tableau, Data Modeling, DAX, SQL, Power Query*

- Designed an interactive Tableau dashboard tracking key banking KPIs such as loan approvals, deposits, and branch-wise performance.
- Used calculated fields and filters to enable dynamic, drill-down analysis for stakeholders.
- Visualized trends in customer transactions and account growth to support strategic planning.

HR Analytics Dashboard | *Tableau, Data Cleaning, Data Modeling, DAX, SQL, Power Query*

- Built an HR analytics dashboard in Tableau to visualize employee attrition, headcount, and department-wise performance metrics.
- Used interactive filters and drill-downs to analyze workforce trends by tenure, role, and location.
- Presented actionable insights to support HR decision-making around retention and workforce planning.

Mobile Sales Dashboard | *Power BI, Data Modeling, DAX, SQL, Power Query*

- Developed a Power BI dashboard analyzing mobile phone sales performance across brands, regions, and price segments.
- Created DAX measures to track revenue growth, unit sales, and top-selling models.
- Enabled dynamic slicers and drill-through reports for deeper category-level insights.

E-Commerce & Sales Analysis | *Python, NumPy, Pandas, Matplotlib, Seaborn, Jupyter Notebook*

- Conducted exploratory data analysis on e-commerce sales data using Python in Jupyter Notebook to identify purchasing patterns.
- Used Pandas for data wrangling and Matplotlib/Seaborn for visualizing sales trends by category, region, and customer segment.
- Identified top-performing products and seasonal demand fluctuations to support sales strategy.

TECHNICAL SKILLS

Programming Languages: Python (Advanced), SQL

Data Analysis & EDA: Pandas, NumPy, Statistical Analysis, Feature Engineering, Data Cleaning, Data Wrangling, Data Modeling

Data Visualization: Power BI, Tableau, Matplotlib, Seaborn, DAX, Dashboard Development, KPI Reporting, Data Storytelling

BI & Reporting Tools: Power BI (DAX, RLS, Power Query), Tableau, Microsoft Excel (Advanced), Pivot Tables, Reporting

Database & Querying: SQL Joins, Window Functions, Aggregations, Subqueries, DBMS, CRUD, ETL

Web Technologies: HTML, CSS, Flask

Developer Tools: Git, GitHub, Jupyter Notebook, VS Code, SQLite

Concepts: Business Intelligence (BI)

EDUCATION

B.E. in Computer Engineering — SB Patil College of Engineering, Indapur

Pursuing | Relevant Coursework: DBMS, Data Structures, Statistics, OOP, Web Technologies

ADDITIONAL INFORMATION

Availability: Immediate joiner — no notice period

Relocation: Open to relocation anywhere in India

Languages: English (Fluent), Hindi, Marathi
